

1-14 August 2022

A modern soil information system

SmartSoil project, one of the projects under the “Accelerating inclusive green growth through agriculture-based digital innovation in West Africa (AGriDI)” initiative is using digital soil mapping and artificial intelligence to provide soil information to farmers and policymakers on what can be done to improve the fertility and biodiversity of Nigerian soils.

Control of malaria in Mozambique

icipe’s AFRO II Project is at the forefront of implementing household screening in Mozambique which is acting as a valuable addition to the malaria vector control toolbox. This year, World Health Organization (WHO) marked World Malaria Day under the theme “Harnessing innovation to reduce the burden of malaria and save lives”.
