

12-18 December 2022

The new bioeconomy strategy is expected to enhance food security in the region. The East African Community (EAC) is aware of the potential for the recently approved regional bioeconomy strategy to expand opportunities for its partner states to intensify their cooperation in developing a sustainable and resilient bioeconomy. The strategy is the first of its kind in Africa and the second in the world after that of the European Union.

13 December at 11:37

This female Torymidae #wasp is our #InsectOfTheWeek. #Torymids are a relatively small family when compared to their related families, which collectively make up the #Chalcidoidea superfamily. This species is a member of the tribe #Podagrionini, which are #parasitoids in the ootheca of praying mantids (Mantodea). <http://www.icipe.org/content/insect-week-13-december-2022>
