**#Insectoftheweek:** This unique looking **#beetle** is a male of the family **#Rhipiphoridae**. You can tell it's a male by the presence of heavily branched flabellate antennae. Behind the antennae are the brownish-orange **#elytra** (the first set of **#wings**). Read more: [icipe.org/content/insect...](https://icipe.org/content/insect...)

Only one day to go until KASH 13 and our symposium on #tungiasis. Possibly the first ever. Don't miss @NTDS\_Kenya present their #integrated surveys, @icipe with environmental control trials and @KEMRI\_Wellcome with first national survey. #beatNTDs @TropMedOxford @dfg\_public
