Using Brachiara grass and Desmodium to control Fall armyworm

Desmodium serves as the push plant in pull-push technology against Fall armyworms. It emits chemical odours that repel moths, preventing them from laying eggs on cereal crops, hence the chances of pest populations building up are reduced.

Market Size and Share Analysis of Edible Insects - Growth Trends and Forecasts (2023 - 2028)

The use of edible insects has been gradually expanding as a result of customer demand for more sustainable and alternative food and feed products. According to recent estimates, approximately 2,111 species of insects are consumed in approximately 140 countries, with entomophagy documented in Asia, Australia, Africa, and the Americas.
