

22 – 31 March 2021

Director General's Office

icipe's Director General was interviewed by *the Jerusalem Post* on how the world can provide enough food. This was part of the Boris Mints Institute's celebration of the 2020 Food Planet Prize winners, which included a webinar focusing on research and development. Dr Segenet Kelemu was one of the panelists during this online forum. Below is a link to the articles and audio.

Fruit flies

Kenyan farmers have been allowed to resume mango exports to the European Union market, thanks to fruit fly management solutions developed by *icipe* and partners.

Locusts

icipe's one of the organizations that provide non-toxic biological methods that control locusts but do not harm the environment.

Animal health

icipe scientists are featured in a Biovision Africa Trust video on the transmission of trypanosomiasis in camels and the socio-cultural effects of livestock rearing in northern Kenya.
