Insect-Based Animal Feeds Improve Poultry Growth

A study conducted has shown that, black soldier fly larvae or proteins derived from them improve poultry health and growth. The findings confirm that black soldier fly-based feeds improve growth performance, meat and egg quality and quantity, and overall farmer profitability.

Bee Documentary

A documentary narrating icipe's instrumental contribution to insect science-based research and development specifically in bee management and domesticating stingless bees was produced by the Amhara Media Corporation in Ethiopia. The documentary combines the achievements of three *icipe* bee projects in the Amhara region.
