icipe launches the PROTEINAFRICA project

With funding from Australian Centre for International Agricultural Research (ACIAR), *icipe* recently launched a project that aims to improve the use of insects as animal feed and create employment for the youth and women through inclusive insect farming technology in Kenya, Uganda, and Rwanda. It is crucial to invest in insect farming technology to make agriculture more sustainable by producing insect-composed organic fertilizer, animal feed, and food for human consumption all at the same time.

Luke Williams
@AusHCKenya

Earlier today, I officiated the launch of the @ACIARAustralia and @icipe insects project for food and feed project.

The 🇦🇺 government is committing \$3 million to develop and facilitate the adoption of insect farming businesses in 🇰🇪 🇪🇨 🇸🇩.
