

23 – 30 November 2020

Integrated Pest Management

icipe is a proponent of the use of biological pest control methods to restore the population of pollinators. <http://english.sina.com/world/af/2020-11-25/detail-iiznezxs3706258.shtml>

Insects for Food, Feed and Other Uses

The Centre also advocates the consumption of insects, which are highly nutritious and healthy food source containing high-quality protein, amino acids, minerals, vitamins and fibre.

Social media

icipe continues to receive congratulatory messages on its 50th anniversary. In addition, there are messages on BioInnovate Africa's bioscience bootcamp, using parasitoid wasps to beat *Tuta absoluta*, and the Insects for Food, Feed and Other Uses Programme being among the finalists of the Food Planet Prize. You can read more about the prize and other finalists [here](#).

Mnogi političari i državnici bi mogli puno naučiti o važnosti znanosti i obrazovanja za razvoj zemalja od Predsjednika Kenije!

Predsjednik Kenije Uhuru Kenyatta održao je ovih dana govor na proslavi vrhunskog međunarodnog instituta icipe lociranog u Nairobiju. Govor je bio fenomenalan i odlično ukazuje na važnost znanosti i obrazovanja za razvoj Kenije ali i cijelog kontinenta Afrike. Kenija ima izvrsnu znanost i Nairobi University je rangiran među prvih 1000 na svijetu.... [Prikaži više](#)
