## Inclusion of insects in the African food systems is key in mitigating impacts of climate change

At the 13th Africa Day for Food and Nutrition Security meeting, there were discussions on the need for concerted efforts to promote the use of insects in culturally acceptable ways, as they are the best sustainable protein source at a time when the implications of climate change have adversely affected livestock production.

The black soldier fly is the mother of the whole production process here.

The initial pupae were given to Zihanga by ICIPE and from there the duo hit the ground running and grew the operations to date.

Zihanga's future outlook is to achieve 100% circular economy #Tuinuane
